

MICHAEL D.C. BOWEN
Manager, Answerthink
Design Lead
Redondo Beach, CA

Mr. Bowen is a data architect in the Hyperion Analytics group. His 20 years experience in IT and ten years experience with Hyperion tools began at the Xerox Systems Group where he was an XNS network administrator & programmer / analyst with PARC technology. Focusing on Data Warehousing and later Web development, Mr. Bowen has mastered a wide variety of technologies over several generations of software. Mr. Bowen has thorough, applied knowledge of Enterprise computing; his expertise in financial and analytic applications is highly valued in many business sectors.

Representative Accomplishments

- Developed with software engineers & product managers product ideas for new analytic applications for Essbase including Website Analysis, Call Center Analysis and Campaign Analysis.
- Developed the prototype for the first analytic reporting suite running against supply chain data.
- Developed the first successful analytic application for the Palm using a unique combination of Hyperion technologies.
- Lead consultant in designing a hybrid Essbase / Hyperion Planning application for the North American operations of a large manufacturing concern. This company's requirements for hands-off control of asynchronous data flows to 31 different Essbase databases required extensive unique back-end process design including integration of data from SAP, SQL Server, Oracle and DB2.
- Over his career, Mr. Bowen has been involved in the development of over 150 production data marts in applications as diverse as shipping & logistics, electronics quality control, demographics, retail merchandizing, medical capitation and activity based costing.

Background

Mr. Bowen's professional experience has included employment with the following organizations prior to joining Answerthink:

Metro Decisions - Mr. Bowen has worked as a principal in his own consulting business as both an independent contractor in the mid-market and as a subcontractor with larger consulting firms for the Fortune 500.

Hyperion Solutions / Arbor Software - Mr. Bowen was most recently Worldwide Business Development Manager for the eCRM division of Hyperion.

Pilot Executive Software -, Mr. Bowen was a technical leader at specializing in Lightship and Command Center products working in Los Angeles, NYC and Cambridge, MA.

Some of the more notable clients Mr. Bowen has worked with in the last several years involving Hyperion technology include: Nissan North America, Cingular Wireless, Banamex, Siebel, Kaiser Permanente & Sony Pictures Entertainment.

Mr. Bowen has considerable experience and expertise using Hyperion Essbase focusing on performance and integration with relational sources and targets. He is ideally suited to oversee design across multiple database platforms leveraging their various strengths. He also has extensive experience designing reports and queries with MSSQL, Oracle 8, & 9, DB2 UDB and legacy 4GL systems. Mr. Bowen also is an experienced script programmer with strengths in Korn Shell, Perl & VB. He has also worked with JavaScript, PHP and Ruby.

Mr. Bowen studied Electrical Engineering at USC and Computer Science at Cal State Northridge.
